

## **How to Make an Ivy Crown**

Ivy grows everywhere in Portland! Take a walk and see where you can find it!

Pull one long vine for every crown you want to make!

You might need to rinse off nature's dust first.

In the middle of the vine make a circle the size needed for your head.

Wrap the two ends back onto this circle, twisting as you go.

When you get to the ends, make sure they get wrapped and tucked into the vine crown to stabilize it.

Add flowers or ribbons to make this crown festive for May Day!
